Job Title: Senior Python Developer

We are seeking a Python Developer to join our engineering team. You will be responsible for writing and testing scalable code, developing back-end components, and integrating user-facing elements.

Requirements:

- Expert knowledge of Python and web frameworks (Django, Flask).

- Experience with cloud services (AWS, Azure) and containerization (Docker, Kubernetes).

- Strong understanding of databases (PostgreSQL, MongoDB).

- Ability to write clean, efficient, and debuggable code.
